DETAILED ACTION

Response to Arguments

Applicant's arguments, see pages 1-4, filed 11/29/04, with respect to claims 1-7 have been fully considered and are persuasive. The Non-final office action of 8/26/04 has been withdrawn.

Allowable Subject Matter

1. Claims 1-7 are allowed.
2. The following is an examiner's statement of reasons for allowance: Prior art fails to show, an electric machine having at least two structural groups containing at least one soft magnetic body each. Prior art also fails to show, the partial area of the surfaces of the two structural groups that lie adjacent to the air gap having inhomogeneous properties with regard to the magnetic flux. Wherein, at least one the soft magnetic body has a region that is facing the air gap, the region facing the air gap having soft magnetic teeth that are disposed toward the air gap consisting of crystalline material with higher magnetizability and/or higher saturation flux density than the remaining region of the soft magnetic body that is disposed more distant from the air gap, the remaining region of the soft magnetic body belonging to the same the magnetic circuit, and the remaining region of the soft magnetic body possessing in total a larger cross section in direction of the flux than the sum of the teeth that are disposed toward the air gap and that conduct the same magnetic flux in one direction of the magnetic circuit. Prior art also fails to show, at least one of the structural groups contains at least two

magnetic units said magnetic units consisting of at least one spooled pole segment and two non-spooled half pole segments, the pole segments and the half pole segments being composed of grain oriented electric sheet, the two half pole segments abutting at least one the pole segment in the yoke area. Prior art also fails to show, at least one of the two structural groups contains at least two adjacent non-spooled half pole segments and a T-shaped holding element that is arranged between the adjacent half pole segments, the holding element magnetically separating the half pole segments and preventing movement of the half pole segments.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
